An East Central Minnesota 5-County Economic Development Partnership

Inline Packaging Expands in Princeton

Inline Packaging LLC is a leader in microwave susceptor food packaging. Inline Packaging designs, develops and produces specialized packaging for microwave foods. They specialize in laminations for browning and crisping of foods in the microwave oven. They are the only in the world with the capacity to susceptor pattern, print, laminate and die-cut in a single pass operation. To learn more [click here](#).

Team Powder Coating Featured in IQ

The keychain in your pocket, the computer on your desk and even the tag on your pet's collar: All may have passed through Hinckly-based Team Powdercoating's maze of conveyor belts and ovens, where a very fine powder is used to color and cover an array of everyday items. To learn more [click here](#).

Manufacturing Operations Growing and Changing in Cambridge

This year Park Manufacturing nearly doubled the size of its facility in Cambridge. The original building was 42,000 SF and the expansion adds an additional 36,120 SF. Likewise, Water Works Manufacturing is completing a new 33,000 SF addition to their building in Cambridge. As the addition is being completed, Nelson Global Products, Inc. has purchased Water Works. 3rd State Certified Shovel Ready Park in GPS Region

With the addition of the Pine City Technology Park, the GPS region now has over 170 acres of industrial park land near major highways that are "Shovel Ready." The others are in Cambridge and Isanti. This is the most concentrated region state wide for this designation. Only 18 sites have been approved since the program was established in 2009. To learn more [click here](#).
